COMMUNITY PILLARS

Education

The Aces prioritize education by partnering with the Clark County School District, youth programs, and non-profits to provide initiatives to reduce the strain on teachers, provide resources to kids and students and encourage the love of reading.

Mental Health & Wellness

Understanding the importance of emotional and physical well-being, the Aces create programs to support mental health awareness and promote healthy lifestyles. Workshops, community events, and social media campaigns focus on stress management, self-care, resilience-building, and wellness education for youth and families. The organization collaborates with local mental health providers to provide resources and guidance, ensuring that community members have access to the support they need.

Youth Participation in Sports

The Aces actively work to make sports accessible to children and teens across Las Vegas through basketball camps and clinics which teach skills, teamwork, and leadership. These initiatives emphasize inclusivity, confidence-building, and physical activity while creating pathways for young athletes to pursue sports at competitive and recreational levels. By engaging youth in structured athletic programs, the Aces promote healthy lifestyles and positive life skills.

The Impact of Aces Community Corner Ticket Donation

"I wanted to take the time out to really tell you the sincerest thank you from the kids. They had an amazing time at the game last week and were out of their seats moving and dancing the whole time. The fan experience was a huge success and the parking made everything so convenient for the group. Again, the Aces remain a community first organization and the attention to detail and the fan experience is always "top tier". Thank you again for the tickets and the experience you truly made a lot of kids smile and have an unforgettable experience that they can cherish in spite of their current circumstances."
